

Introduction to Cleaning Data in R

Andrew Hicks

2020-03-19

Data Science Process: Collect » Clean » Analyze » Report

What we'll cover in this course:

1. Exploring raw data
2. Tidying data
3. Preparing data for analysis
4. Putting it all together

```
# View the first 6 rows of data  
# head(weather)  
  
# View the last 6 rows of data  
# tail(weather)  
  
# View a condensed summary of the data  
# str(weather)
```

```
x <-5  
x
```

```
## [1] 5
